simple. smart. fast.

NEXTGEN® POWERED BY
VIRMEDICE

NEXTGEN®
HEALTHCARE

SIMPLE
Easy-to-use,
role-based workflows.

SMART
Logical,
clean design.

FAST
Streamline
implementation and improve
patient throughput.

Whether you need to replace your existing electronic health record (EHR) with one that complies with MU and is ready for MIPS, or you're ready to invest in your first EHR, see how the revolutionary, ambulatory EHR— the new 8 Series— can help you work simpler, smarter, faster, and stay more connected.

You have to see it—and experience it—to believe it.
The recreated NextGen® Ambulatory EHR is a game changer.

Work simpler and safer.

Role-based workflows help your efficiency skyrocket and reduce the administrative burden of documentation, all while improving care management.

Work Simpler and Safer

Be more efficient. Reduce administrative burdens. Improve care management.

- **Streamline MU/MIPS reporting** using embedded criteria—and receive measure credits without leaving your work-flow

- **Improve care management** using guidelines embedded in your work-flow and an automatic risk factor display

- **Easily view important vital signs and lab data** for a patient's relevant chronic conditions

- **Help standardize care** using "standing orders" and nurse protocols

- **Reduce charting time**, and chart by exception, while simultaneously creating a full patient note

- **Automatically eliminate duplicate items**

- **Save significant time** by eliminating free-text typing, by streamlining data entry/configuration, and more

- **Obtain CMS credit** simply by clicking on the "reviewed" check box

Diagnosis Search Tool

Work simpler using our new ICD-10 diagnosis search tool. With this web browser-like search, results are ranked by relevance and frequency of use. Using simple drag-and-drop functionality you can configure this tool, by user, on the fly!

Work smarter.

You can work intelligently using the 8 Series' specialty-focused content, delivered in a logical, simple layout, with a crisp, clean design.

Work Smarter

Work intuitively and intelligently using a crisp, new, clean EHR design.

- **Physician-friendly design** reflects how physicians think in a way that feels natural and easy

- **Enjoy an intuitive user experience** via streamlined navigation, intelligent use of color, and clean screen appearance
  - Configurable, easy-to-use navigation and patient information bar
  - Auto-grow grids minimize scrolling

- **Change order sets on the fly** without learning a template building tool

- **Take advantage of 20 years of collective intelligence**—and the input of countless healthcare providers

Content for 25 specialties

Every patient, practice, and provider is different. That's why, with NextGen Ambulatory EHR, you can adjust for specialty- and practice-specific needs on the fly, and accommodate patient variability—all without the hassle of system configurations.

Intake Screen

The simple, streamlined design and heads-up display helps you work smarter, showing you meaningful information about the patient as soon as you open the chart. The muted color palette of cool grays, whites, and subtle blues helps you focus on important alerts and, ultimately, your patient.

Work faster and easier.

Get ready to streamline implementation, minimize training time, and attain outstanding adoption rates—all without time-consuming EHR customizations.

Work Faster and Easier

Streamline implementation. Improve adoption rates.

- **Personalize your user experience**—without customizations—using role-based workflows
  - Add favorites and save complete workflows

- **Reduce training and implementation time** by leveraging the intuitive navigation and design

- **Use the EHR efficiently and help ensure outstanding adoption rates** via intelligent workflows
  - Save an entire SOAP note, then reuse it for common findings, using "Quick Note"

  - Retain your preferences for procedures and exams using "Quick Saves"

🕐 Quick Note

Save a SOAP note

then reuse it for common findings, using "Quick Note"

Home Screen

The Home screen quickly allows you to work faster and see past HPIs, exams, assessments, and plans, as well as review medications, allergies, and past medical history. Easily flip through the chart with the auto-grow grids.

Work connected.

Enhance patient care via real-time access to up-to-the-minute patient data. As your one-stop connectivity solution, our EHR helps to ensure you stay well connected.

Work Connected

Get real-time data access. Automate referrals and more.
Connect with your community.

- **Add interoperability** – use a shared database and single-vendor architecture

- **Gain real-time access** to up-to-the-minute patient data for higher care quality

- **Ability to view and document Coordination of Care** used by the whole care team
  - Team member list, referral history, care plan history, and more

- **Automate referrals, prescriptions, lab results**, and more

- **Communicate more efficiently** with your patients using NextGen® Patient Portal

- **Align your clinical and business requirements** with our total, integrated solution

- **Connect with other exchanges**, registries, and more

NextGen Ambulatory EHR integrates with the entire product suite—including NextGen® Practice Management, NextGen® Patient Portal, and NextGen® Population Health—for consistent, real-time clinical and administrative workflow. As you evolve, the enterprise architecture supports your changing business requirements.

Meet Your MU, MIPS, and ACO Goals

Value-based reimbursement delivery models require providers to meet quality benchmarks, focus on prevention, and better manage the health of their patient population, particularly those with chronic diseases.

NextGen Ambulatory EHR provides the functional foundation you need to comply with ICD-10 and meet your Meaningful Use (MU), Merit-based Incentive Payment System (MIPS), and Accountable Care Organization (ACO) objectives. The EHR evolves with the healthcare market—and you—as needs and industry demands change.

We can help you achieve these goals by:

- **Demonstrating Meaningful Use of a certified EHR** throughout all stages of MU

- **Enabling the exchange of clinical and financial data** across the entire spectrum of care

- **Helping you measure, monitor, and manage** your patient population

- **Partnering with you** to achieve continuous healthcare improvement and cost reduction

- **Helping you improve** your patients' experience of care

Strong ROI equals peace of mind

When you invest in an EHR, in addition to helping you provide better care, you want it to also provide a powerful ROI—and the peace of mind that that comes when your EHR helps you maintain and increase your financial health.

The 8 Series EHR content offers visibility into your profitability and proven ROI:

- **Better cash flow** through optimized claims and fewer denials

- **Improve and track outcomes** for pay for performance revenue—and more referrals

- **Increase patient volume**, such as for health maintenance, by leveraging automated reminders

- **Streamline reporting** via automated MU-related data capture directly into your workflow

- **Improve reimbursements** with better E&M coding accuracy

- **Reduce expenses** for transcription, paper, postage, storage, and data exchange

A smart financial investment

The 8 Series EHR content is flexible to aquire, straightforward to implement, quick to learn, and simple to use. All factors that help ensure you've made a smart financial investment. However, there's more.

- **A proven best practices implementation methodology** where you choose your pace

- **Numerous training methods** such as on-site, web, and training centers—as well as continuing education

- **24/7 support** with a Phoenix-based support team

- **Interoperability** with major practice management systems, labs, radiology, and diagnostic equipment

- **A commitment to maintain current certifications**

Realize your ROI in less time than other systems, and quantify actual results. Choose a partner that evolves with the healthcare market—and you—as your needs and industry demands change. Let us help you reach your quality goals as you face the challenges of MU, MIPS, ACO, and more.

Ten Reasons to Choose
NextGen® powered by VirMedice

1 Inter-operable with major lab, radiology systems and diagnostic equipment

2 Integrates with the entire product suite for a complete solution

3 Delivers a strong, proven ROI via better cash flow, streamlined reimbursements, and more

4 A 100% Client success rate meeting quality goals such as MU, PCMH, ACO, and more

5 Developed with the patient in mind to help you raise your level of care for your population

6 Comes with a proven implementation methodology designed to fit your specific needs

7 Countless physicians have quickly adopted and embraced its user-friendly design

8 Comes with personalized 24/7 support from a Phoenix-based support team

9 Scalable to any practice size, specialty, or role —and personalized to each user

10 Evolves with the market, and you, while maintaining current certifications
